

VISHWANATH GOUDA

COMPUTER SCIENCE
& ENGG

A highly motivated, well qualified individual with thorough experience in the knowledge of languages and development tools and to work for an organization which provides me a opportunity to improve my skills and knowledge to grow along with the organization's objectives.

INTERNSHIP

WEB DEVELOPMENT - SEP. 2023 – OCT. 2023
EXPOSYS DATALABS

Major accomplishments:

- Spearheaded the development of a video chatting website using the Zegocloud API, contributing to the enhancement of online communication capabilities.
- Worked independently to ensure the successful integration of Zegocloud API, showcasing problem-solving skills and API integration expertise.

EDUCATION

BE IN COMPUTER SCIENCE AND ENGINEERING – DEC. 2021 – JUNE. 2024
NITTE MEENAKSHI INSTITUTE OF TECHNOLOGY - Bengaluru, Karnataka
CGPA – 7.76

DIPLOMA IN COMPUTER SCIENCE AND ENGINEERING – JUNE. 2018 – NOV. 2021
MES RN SHETTY POLYTECHNIC – Sirsi, Karnataka
PERCENTAGE – 92%

PROJECTS

- **ANDROID MALWARE DETECTION USING DEEP LEARNING**
 - Dataset Challenges: Utilizing a dataset from Cuckoo Sandbox, containing over 40000 malware samples which includes a variety of malware and good ware samples for training the detection system.
 - Algorithm and Evaluation: Composed a CNN algorithm achieving 96.7% accuracy in detecting malware.
 - Contribution and Methodology: Trained and tested the CNN model with over 50 iterations, conducted extensive testing and validation to ensure high accuracy and reliability.
- **TASK MANAGEMENT APPLICATION**
 - Technologies Used: HTML, Bootstrap, Tailwind CSS, JavaScript, Node.js, Express
 - Description: A simple web application to manage tasks with a user-friendly interface. Includes backend server for task storage.
 - Key Contributions: Designed frontend/backend, assessed local storage for persistent data. Managed over 1,000 tasks with a robust and scalable architecture
- **TO-DO LIST,CALCULATOR AND TRIBUTE PAGE**
 - Technologies Used: HTML, Bootstrap, Tailwind CSS, JavaScript, Node.js, Express

SKILLS

PROGRAMMING:

JAVA, MySQL,PYTHON(Basic)

WEB TECHNOLOGIES:

HTML, CSS, JS, BOOTSTRAP,
NODE.JS,REACT.JS

DATABASE : DBMS, MONGO DB

DEVELOPER TOOLS: GIT, BASH,VS
CODE, JUPYTER, GOOGLE COLAB

STRENGTH

TEAMWORK

LEADERSHIP

TIME MANAGEMENT

QUICK LEARNER

CERTIFICATIONS 📄

- JOY OF COMPUTING USING PYTHON- NPTEL
- PRINCIPLE OF MANAGEMENT- NPTEL
- MACHINE LEARNING APPLICATIONS- AQMENZ AUTOMATION PVT. LMTD
- AWS ACADEMY GRADUATE

- Description: A simple web application to manage tasks with a user-friendly interface. Includes backend server for task storage.
- Key Contributions: Designed frontend/backend, assessed local storage for persistent data. Managed over 1,000 tasks with a robust and scalable architecture
- **WEATHER APP**
 - Technologies Used: HTML, CSS, JavaScript, Weather API
 - Description: Built a real-time weather application with a 95% accuracy rate for weather predictions.
 - Key Contributions: Realtime application with Integrated Weather API, established responsive UI.
- **MEME GENERATOR APP**
 - Technologies Used: HTML, CSS, JavaScript, Meme Generator API
 - Description: Introduced a web application that generates memes using the Meme Generator API.
 - Key Contributions: Integrated the Meme Generator API, implemented customization features, processed over 1,000 meme requests
- **VIDEO CHATTING WEBSITE**
 - Technologies Used: HTML, CSS, JavaScript, ZEGOCLOUD API
 - Description: A video chatting website supporting up to 100 simultaneous users.
 - Key Contributions: Pioneered real-time chat, designed interface.
- **SIMPLE LMS**
 - Technologies Used: HTML, CSS, JavaScript, Local Storage
 - Description: Created a simple LMS for course management.
 - Key Contributions: Composed frontend, implemented local storage.

ACHIEVEMENT

Submitted a paper to the IEEE Conference, 2024 Second International Conference on Networks, Multimedia and Information Technology (NMITCON (NMITCON-2024)) on “Android Malware Detection Using Deep Learning Techniques.”
