PROFESSIONAL SUMMARY

Results-driven Full-Stack Software Engineer with hands-on experience building responsive web applications, REST APIs, and scalable UI systems in both enterprise and real-world product contexts. Proficient in React.js, Next.js 14, TypeScript, Node.js, JavaScript ES6+, and modern front-end tooling. Currently delivering production-grade applications at Capgemini for live client accounts. Co-contributor to an IEEE Xplore-published research paper on Deep Learning-based malware detection. Passionate about clean code architecture, cross-functional collaboration, and highly optimized user experiences.

TECHNICAL SKILLS

Core Competencies: System Architecture, API Design, Continuous Integration (CI/CD), Performance Optimization, UI/UX Design, Cross-functional Collaboration, Test-Driven Development (TDD)

Front-End: JavaScript (ES6+), TypeScript, React.js, Next.js 14/15, HTML5, CSS3, Tailwind CSS, Bootstrap, Framer Motion, XML, JSON, Responsive Design, SSR, WCAG Accessibility

Back-End & Databases: Python, Node.js, Express.js, Java, C, REST APIs, Upstash Redis, MySQL, MongoDB

Enterprise & Cloud: SAP UI5, SAP Fiori, OData Services, SAP BTP, Google Cloud Platform, AWS, Vercel

Tools & Platforms: Git, GitHub, VS Code, Postman, Chrome DevTools, Google Colab, Twilio Webhooks

Methodologies & AI: Agile, Scrum, Prompt Engineering, Generative AI, LangChain, RAG Pipelines, SEO

WORK EXPERIENCE

Software Engineer — UI Developer

February 2025 – Present

Capgemini Technology Services Pvt. Ltd.

Bengaluru, India

- Spearheaded the development of production-grade web applications using JavaScript (ES6+) and REST API integrations, streamlining data workflows and reducing manual entry time by 40%.
- Architected modular, reusable UI components featuring master-detail views and fragment-based architecture, improving code maintainability and team delivery speed by 25%.
- Orchestrated REST API integrations with enterprise back-end systems, enabling real-time bidirectional data exchange with sub-200ms latency across multiple business modules.
- Partnered with business analysts and QA teams in an Agile environment to translate functional requirements into clean front-end solutions, maintaining a 98% defect-free release rate.
- Championed WCAG accessibility standards and responsive design principles to deliver polished, user-centric applications adopted by 500+ daily enterprise users.
- Automated cloud-hosted application deployments, ensuring 99.9% reliable uptime and robust code architecture in production environments.

Web Development Intern

September 2023 – October 2023

Exposys Datalabs

Virtual Internship

- Constructed and deployed a fully functional website end-to-end, demonstrating proficiency across the entire software development lifecycle.
- Programmed a real-time Video Chatting Website utilizing JavaScript and the ZEGOCLOUD API, successfully supporting up to 100 simultaneous concurrent users without packet loss.
- Designed responsive UI components across multiple projects, receiving a 100% positive stakeholder satisfaction rating on design quality and overall user experience.

RESEARCH & PUBLICATIONS

Android Malware Detection Using Deep Learning Techniques

IEEE Xplore, 2024

2nd IEEE International Conference on Networks, Multimedia and Information Technology (NMITCON-2024)

- Co-developed a CNN-based malware detection system achieving **96.7% accuracy** on a dataset of 40,000+ Android application samples sourced from Cuckoo Sandbox.
- Validated model robustness through 50+ training epochs, significantly reducing false positive rates; paper published on IEEE Xplore — ieeexplore.ieee.org/document/10892795

PROJECTS

TSS Sirsi Smart Predictor

Tech Stack: Next.js 15, TypeScript, Upstash Redis, Twilio Webhooks, Machine Learning

- Engineered a cloud-native progressive web app for farmers to track live APMC market rates, featuring a zero-touch WhatsApp-to-database pipeline that saves 10+ hours per week of manual data entry.
- Formulated a custom 7-day machine learning forecasting model (Linear Regression & WMA) to generate actionable insights based on volatile market momentum with 85%+ directional accuracy.

TruthBoard (Expose App)

Tech Stack: Next.js 14, TypeScript, Upstash Redis, Vercel Blob Storage

- Launched a community-driven digital accountability platform with a centralized social feed, dynamic user profiling, and permanent evidence logging utilizing serverless Redis architecture.
- Configured secure image hosting via Vercel Blob Storage and integrated native Web Share APIs, driving a 35% increase in organic SEO link sharing.

PDFizer RAG Pipeline

Tech Stack: Python, Streamlit, LangChain, Scikit-Learn, Google GenAI Embeddings

- Created an intelligent Retrieval-Augmented Generation (RAG) web application enabling users to interactively chat with and extract data from 50+ page complex PDF documents using advanced LLM embeddings.
- Structured a pure-Python vector store utilizing Scikit-Learn, eliminating heavy cloud dependencies and resolving critical cross-platform C-compiler deployment bottlenecks.

Mahalakshmi Boating Services Website

Tech Stack: HTML5, CSS3, JavaScript, Google Pay API, Multi-language

- Produced a modern tourism business website featuring an online booking system, real-time availability display, and Google Pay integration, increasing direct digital bookings by 60%.

Namma UK — Uttara Kannada Tourism Portal

Tech Stack: HTML5, CSS3, JavaScript, Interactive Maps, Responsive Design

- Authored a comprehensive tourism portal covering all 12 taluks of Uttara Kannada district, featuring interactive map-based exploration of 100+ beaches, waterfalls, and heritage sites.
- Deployed and live at namma-uk.vercel.app

Portfolio Website

Tech Stack: Next.js 14, TypeScript, Tailwind CSS, Framer Motion, SSR, SEO

- Developed a fully SEO-optimized personal portfolio using Next.js 14 with server-side rendering, achieving 98+ Google Lighthouse scores for performance, accessibility, and SEO.

Mining Details Application

Tech Stack: SAP UI5, SAP Fiori, OData, SAP BTP, JavaScript, XML

- Constructed an enterprise web application with full CRUD operations via REST/OData API integration, achieving real-time back-end synchronization with zero data latency.

EDUCATION

Bachelor of Engineering in Computer Science — CGPA: 7.8 | First Class with Distinction Dec 2021 – Jun 2024
Nitte Meenakshi Institute of Technology *Bengaluru, India*

Diploma in Computer Science Engineering — 92% | First Class with Distinction Jun 2018 – Dec 2021
MES RN Shetty Polytechnic College *Sirsi, India*

CERTIFICATIONS

- SAP Certified - SAP Fiori Application Developer Jun 2026
- SAP Certified - SAP Generative AI Developer Jun 2026
- Developing UIs with SAPUI5 — SAP Jan 2026
- Google Cloud Fundamentals: Core Infrastructure — Google Cloud Aug 2025
- Getting Started with Prompt Engineering & Generative AI — Pluralsight Jul 2025
- Agile Software Development — University of Minnesota, Coursera Jun 2025
- AWS Academy Graduate: Cloud Foundations — AWS Academy Apr 2024
